

# Our Computer Heritage

## Acknowledgements.

The *Our Computer Heritage* project was launched by the Computer Conservation Society (CCS) in 2003. Many volunteers, most of whom are members of the CCS, have researched the technical information. Their names are given below.

The *Mainframes* section of the project includes information and illustrations culled from manuals and brochures originally published by Elliott Brothers (London) Ltd., Ferranti Ltd., EMI Ltd., English Electric Ltd., Leo Computers Ltd., British Tabulating Machine Co. Ltd., International Computers & Tabulators Ltd. and ICL. We are grateful to the successors of these companies (principally Fujitsu Ltd., BAE Systems and Telent plc) for permission to use the material.

The *Minicomputers* section of the project includes, or will shortly include, information and illustrations culled from manuals and brochures originally published by Business Computers Ltd., Computer Technology Ltd., High Level Hardware Ltd. and Information Computer Systems. Steps are being taken to seek permission from the successors to these companies but, due to the plethora of mergers and take-overs, the audit trail is somewhat complex. Minicomputer information included from Ferranti Ltd. and from GEC Ltd. is covered by the permissions granted by the successors of these companies (principally BAE Systems and Telent plc).

We acknowledge the help given by various museums, archives and organisations, especially the following:

The National Archive for the History of Computing;  
The National Museum of Science and Industry group, which includes the Science Museum in London and its Wroughton repository and the Museum of Science and Industry in Manchester (MOSI);  
National Museums Scotland;  
The LEO Society;  
The Bletchley Park Trust;  
The National Museum of Computing at Bletchley Park;  
The Jim Austin Computer Collection;  
Science & Technology Facilities Council (STFC), Rutherford Appleton Laboratory;  
Computer Laboratory, University of Cambridge;  
School of Computer Science, University of Manchester.

The following volunteers, most of whom are members of the Computer Conservation Society, have contributed in various ways to the project since 2003:

Iann Barron	Michael Knight
Rod Brown	Frank Land
John Buckle	Simon Lavington
Chris Burton	Tony Morgan
Peter Byford	Kevin Murrell
Hamish Carmichael	Peter Niblett
Dai Edwards	Richard Overill
Bill Findlay	John Panter
Eric Foxley	Virgilio Pasquali
Terry Froggatt	David Pentecost
Nigel Furness	Lisa Robinson
Dave Goodwin	John Steel
John Gosling	Patrick Sugrue
Phil Gregg	Frank Taylor
David Holdsworth	Alan Thomson
Bob Hopgood	Alan Wakefield
Toby Howard	Brian Wichmann
Roger Johnson	Martin Wright.

The above list is believed to be correct as at May 2015. Many thanks to all of the above, and apologies to anyone else whose name has inadvertently been omitted.
