

**Catalogue W, for box-file W1.**

**Scope:** 40 Honeywell technical manuals from the period 1961 to 1964. These cover the Honeywell 200, 300, 400, 800, 1400 & 1800 series computers. The whole collection of these manuals, which are approximately A4 page-size, occupies 30 cms (1 ft.) of shelf space, equivalent to about five conventional box-files but here listed as a single over-sized box W1.

**Background to the collection.**

These Honeywell documents have been donated by Roy Irons. Roy worked as a computer operator at Ilford Ltd. from February 1961. At about this time Ilford was installing its first computer, a LEO II. Roy's LEO II documents are catalogued with the rest of LEO items, in box-file UK3. In due course the LEO II at Ilford was replaced by a Honeywell computer and Roy later worked for Honeywell.

<b>Cat. No.</b>	<b>Date</b>	<b>Title</b>	<b>Description/comments</b>
W1	1964	Honeywell 300: Program reference manual	August 1964
W1	1963	Honeywell 400	General information manual, July 1963
